

TRICON/E3® Transmitter

TRICON/E3 transmitters provide an interface between the water meter and an electronic controller for batching processes, monitoring flow totalization, and/or flow rate data.

An electronic digital pulse output with the 4–20mA option is available for customers requiring both digital and analog outputs. Reverse flow indication is available with the high frequency forward/reverse pulse output option.

The TRICON/E3 transmitter mounts between the meter maincase and the register. The bayonet-type mount allows the TRICON/E3 to be easily retrofitted to many existing Neptune meters without interruption. Contact Neptune regarding compatibility.

The TRICON/E3 with the 4–20mA option provides an analog signal that is proportional to the flow. Together, the digital pulse signal and the 4–20mA output provide information on total consumption and flow rate for close monitoring of water usage.

The TRICON/E3 with the high frequency forward/reverse pulse output option can be used in applications where directional flow monitoring is required in addition to total consumption and flow information.

Every Neptune meter meets or exceeds the latest AWWA standards ensuring accurate, dependable performance.

Neptune TRICON/E3 units are ideally suited for monitoring/controlling total flow rate data such as:

- Instantaneous readout of customer consumption via remote instrumentation or computer
- Batch or continuous process
- Water softening regeneration
- Demineralization
- Reverse osmosis
- Chemical treatment/injection
- Filtration
- Boiler feed water make-up
- Cooling tower water make-up
- Irrigation
- High or low rate alarming
- Reverse flow alarming

Dual optical switches allow the TRICON/E3 to distinguish between forward and reverse rotation, eliminating false pulse generation under low or no flow conditions.

Warranty

Neptune provides a limited warranty with respect to its TRICON/E3 transmitters for performance, materials, and workmanship.

Key Features

- Electronic pulse output proportional to the meter's rate of flow
- Electronic pulse output available with 4–20mA output or high frequency forward/reverse pulse output
- Mounts between the meter and register – Direct Read, ARB®, or ProRead AutoDetect
- Utilizes dual optical switch type design which is more accurate and reliable than the older single optical switch designs
- Stainless steel ball bearings minimize torque
- Tamperproof seal pin to prevent unauthorized access
- In-line adaptability allows installation or service without interrupting the meter service

Performance Data

Meter Type & Size	Pulses/ US Gallons	Flow Rate @ 4 mA Output (US GPM)	Flow Rate Value @ 20 mA Output (US GPM)

Both Models (unless otherwise specified)				
	Operating Temperature	0	70	Degrees C
	Storage Temperature	-40	85	Degrees C
	Supply Voltage	-30	30	Volts
	Output Load (Pulse Output)	1200		Ohms
	Output Current (Pulse Output)		0.01	Amps

Specifications

- Sizes:
 - T-10 (5/8"-2")
 - HP Turbine (1 1/2"-20")
 - Tru/Flo Compound (2"-6"x8")
 - HP Fire Service Turbine (3"-10")
 - HP Protectus III (4"-10")
- Register Compatibility:
 - Direct Read
 - ARB®V
 - ProRead AutoDetect
- Connection Wire:
 - Distances up to 1000 feet – AWG
 - #22 twisted pair cable
