

Description

Transmits a scaled electrical pulse signal (switch closure type) for each discrete unit of liquid volume metered during a batching cycle and continuous digital totalized readings. The 6 inch dial face with gasketed viewing glass display, contains 5 digits to display totalization and can be configured to display any standard engineering unit (i.e. U.S. gallons, Imp. gallons, pounds, and liters). A large sweep hand is located in the center of the register. The sweep hand can not be reset. A microswitch is activated each revolution of the sweep hand. The value of the pulse is equal to the range of the dial face. Variations are possible by adding lobes to the cam (up to 10) and or changing the range of the dial face. Maximum sweep hand speed is 60 RPM.

Technical Information

Functional Specifications

Registration	U.S. gallons, Imp. gallons, pounds, liters, etc.
Value per Rev	1/10/100/1000/other
Operation	Mechanical drive
Sweep Hand	Non resettable
Display Outputs	Digital Non-resettable Total with sweep hand
Display Digits	5
Microswitch	Form C Dry Contact Rating: 10A@ 120 VAC, SPDT/120 or 600 pulses/min
Temperature	Use vertical extension if liquid > 250° F (121° C)
